

SECOND VICTORY LOAN DRIVE NOW ON

News of Our Boys

Phil Charter went east last week for further training with the air force.

Max Webber was home from Edmonton between trains on Feb. 13th and was being transferred west for his elementary training.

P.O. Harold Lisson visited with friends in Irma last Saturday while on leave from Macleod, Alta.

Lewis Jones who has enlisted in the Engineers was in Irma on leave last Saturday.

What The Air Waves Are Saying Over Station CJCA

Entertaining, informative, thrilling—raised to the superlative degree, describe the inspirational series of Victory Loan programs—programs of a calibre which will bring you genuine pleasure. They offer information about the magnitude of Canada's war effort and how money is spent. Things every Canadian should know about Canada. When a person realizes the immensity of the work being done there is a definite sensation of pride. These thrill-packed programs serve the double purpose of bringing home to us Canadians the need for dollars-for-Victory as well as the solidarity of the investment. Don't miss these powerful new broadcasts from CJCA Mondays, Wednesdays and Fridays at 8 p.m.

Any Bonds Today?

There's long been a theory that Charlie McCarthy is really the subconscious self of Edgar Bergen. It's no secret that in private life Bergen is shy and retiring and sometimes frankly bashful. Charlie, as you know, is just the opposite. He sez things that Bergen would never have the courage to utter, being particularly bold in his conversations with the famous guest stars who have shone on the show. (We noticed, however, that the Impish puppet was recently rather quiet when E.B. was confined to a hospital!) At any rate, Bergen is still wondering about the fabulous success which he and Charlie have achieved. Because Bergen (to Bergen) is no great personage.

Bonds Buy Bombs—

"Double or Nothing" an outstanding new streamlined quiz, originates from Edmonton's spacious new Garneau theatre. Outstanding feature—successful contestants can double their winnings by answering further questions that are graduated as to difficulty, or they can immediately accept their winnings. Money on Monday at 9:30 p.m. at 9:30 on your dial.

St. Mary's W.A. wishes to express sincere thanks for such hearty response to their Valentine tea, February 14th.

HOCKEY

On Friday, February 6, the Irma juniors played host to the Alma Mater all-stars. The final score was 6-3 in favor Irma. Scorers for Irma were Jones and Myers with two each and McFarland and Stead with one each. Assists were earned by Parsons, Raham, Knudson and McFarland.

On Saturday, February 14, the Irma junior hockey team journeyed to Holden and brought back a 5-3 win over the Holden Juniors. The game featured close checking and was hard fought all the way. Sonoff in the Irma nets played brilliantly. Time and again he was called upon to make spectacular saves and each time he rose to the occasion.

The first period ended without a score. Shortly after the start of the second period Holden scored to take a 1-0 lead. From then on the Irma boys went to work and at the end of the period were leading by a 3-1 score. Two of the Irma goals were scored in less than a minute on a power play while Holden was short-handed.

In the third period both teams scored twice to make the final score read 5-3 in favor Irma.

INCREASE YOUR BOND PURCHASE

As the war lengthens, Great Britain's needs grow and grow, and as Canada's armed forces increase steadily month by month in terms of men and equipment, the Canadian government has had to revise its estimate of what money must be obtained from the people of the country in order to prevent any slackening of pace. On Feb. 18 the Second Victory Loan Organization will commence a campaign to raise at least \$600,000,000. In all likelihood, much more than that will have to be raised later in the year.

No private citizen is in a position to shrug his shoulders when told about this particular problem at Ottawa. Because in this instance particularly the government problem becomes the government's problem. As the government revises the general estimate of new money to be found, the private citizen must revise his estimate of how much he shall subscribe to the forthcoming loan and another or others later in 1942.

Only if the majority of citizens accept the necessity for a revision of the amount of Victory Bonds they had planned to buy in 1942, will higher Victory Loan objectives be reached.

The most earnest plea which the country of Canada can make at the present time is that he do everything in his power to increase his purchase of Victory Bonds.

\$77.90 Raised In Irma For Soldiers Cigarette Fund

The old time dance held in Kiefer's hall in aid of the cigarette fund on February 6th, was a huge success to say the least. The music which was all donated, was highly praised. For this we extend sincere thanks to the Sanders men, assisted by Hiram Barton, violin, and Mrs. Black at the piano; to Mr. and Mrs. Martin Enger, assisted by Mr. Allen Taylor on the sax and Mr. J. Kennedy, banjo; then to Mrs. C. Pyle and Mr. O. Lovig, assisted by some of the former players; to Miss Betty McLean, Neil McMillan, Mrs. B. Long, and if we have overlooked any, please accept our grateful thanks. Then to Mr. Black, the very efficient floor manager, to all who brought cake or sandwiches, and especially to Mr. E. Elford who made and donated 2 eight-gallon cream cans of coffee. Thank you one and all.

MUN. HOSPITAL BOARD PREPARES ESTIMATES

The regular monthly meeting of the board of trustees of the Wainwright Municipal hospital district No. 17, was held at the hospital Feb. 14, 1942. Trustees present: Chairman J. Collette and trustees Mrs. H. Washburn, T. Withnell, D. Gardiner and O. Gould.

Moved by trustee Mrs. Washburn—that the minutes of the last regular meeting be adopted. Cd.

Moved by trustee Gardiner—that the resignation of Miss H. A. Joy be accepted with regret and a letter of appreciation be given. Cd.

A letter was received from Dr. J. T. Hill of Hughenden, asking for permission to hospitalize and treat his patients in the Wainwright hospital.

Moved by trustee Gould—that secretary write Dr. A. C. McGugan for the standing of Dr. Hill with medical association, and also ask Dr. McGugan to give in writing the proper procedure to be taken when granting a doctor permission to practice in the hospital. Dr. J. T. Hill to be notified as soon as reply is received. Cd.

Moved by trustee Gould—that the two liability policies No. 405155 and No. 403480 be renewed. Cd.

Moved by trustee Mrs. Washburn—that estimates be approved with 15 per cent increase on all requisitions and forwarded to the department for approval.

Four (4) ayes, one (1) nay, trustee Gardiner. Cd.

In preparing the estimates for the coming year the board dealt with the following figures:

Estimated revenue: Municipal requisitions, \$10,254.55; patient's fees, \$9000.00; government grant, \$2,700.00; subscribers' fees \$150.00; total \$22,404.55.

Estimated expenditures: Administration, \$2,320; professional care, \$7,184.00; general house and property \$2,145.00; maintenance, \$2,650.00; capital repayments, \$2,327.50; total \$21,926.50.

The requisitions for the year from municipal bodies were apportioned as follows: Battle River, \$1,423.90; Buffalo Coulee, \$250.70; Gilt Edge, \$5,095.65; Grizzly Bear, \$451.95; Vale, \$587.65; Town of Wainwright, \$2,435.70; total, \$10,254.55.

Moved by trustee Mrs. Washburn—that the report of the finance committee be accepted the ledger and bank book having been examined and found correct. Cd.

The matron's report for the month of January was as follows: Patients admitted, 28; patients discharged, 35; medical, 13; surgical, 7; obstetrical, 4; infants born 4; clinicals, 8.

Hospital days for months 336.

Moved by trustee Gould—that

A meeting was held at the home of Mrs. Black to decide just how would be the best way to handle this fund. It was decided to form a club as it would be necessary to have a president and a secretary-treasurer in order to have a bank account from which to handle the purchase of cigarettes for the Irma boys overseas. Officers elected were, president, Mrs. Black; secretary, Mrs. I. Knudson. A small fee of 10c was decided on as membership to the club. The name chosen was Irma Victory Cigarette Club.

The I.V.C.C. voted to send \$25.00 to the Army and Navy Cigarette Fund for Alberta boys overseas, and to send a box of 300 cigarettes at regular intervals to the Irma boys in England.

The address of all boys overseas is urgently requested by the secretary, at the earliest possible time. It was moved that a letter of thanks be written to Mr. Kiefer for his substantial cut in hall rent.

A hearty vote of thanks was also extended to the hockey teams who turned over the receipts of their game on Wednesday, February 11.

IRMA Y.P.U. REPORT

The last meeting of the Irma Y.P.U. was held on Feb. 12. It was under the leadership of Marion Longmire, convener of missions group. The president, however, had charge of the entire meeting as the leader was sick.

During the devotional part of the meeting, the scripture was given by Irene Burr, a prayer by Solveig Steffensen, a solo by Hilda Klassen and the topic on "Missions" by Vera Simmermon. A hymn closed this part of the meeting.

It was decided during the business meeting that we should have the variety concert on the 24th of March unless more time is needed for practicing of the play.

The program consisted of a piano solo by Henry Kasten, a reading by Mina Hill, mouth organ solo by Percy Congdon, a reading by Isabel Craig, a short skit in which Deloraine Stockton and Harold Elliott took part.

The young people then retired to the basement where several games were played and lunch was served.

The meeting closed with "God Save the King."

ONE WAY FARMERS COULD CO-OPERATE

There is sufficient farm machinery in the west to farm 250 million acres, while the actual acreage farmed is around 61 million, 41 million of which is needed to field crops each year.

This statement was made by G. N. Denike of the dominion experimental station at Swift Current, Saskatchewan, in an address at the agricultural short course recently held in Calgary under the auspices of the Calgary Board of Trade.

The investment in farm machinery in the prairie provinces is \$856 million, according to the latest authentic figures available, Mr. Denike said. This equals \$14.00 an acre, and the annual cost per acre per year is \$2.35.

Mr. Denike recommended that there be more co-operation among farmers in the use of farm machinery. The main objective in a past has been for each farmer to try to make his farm an independent unit. This has resulted in a huge expenditure in farm machinery. It would be more economical if farmers would join together for the purchase of certain machinery.

matron's report be accepted. Cd.

Moved by trustee Gould—that accounts amounting to \$1,485.55 be accepted and cheques issued. Cd.

Moved by trustee Gardiner—that the meeting adjourn. The next regular meeting to be held March 14, 1942.

The World of Wheat

by H. G. L. Strange
Director of the Searle Grain Co.

All farmers are waiting anxiously to hear the decision of the government about an increased price for wheat, and about the quantity of wheat that farmers may deliver from the forthcoming crop at that increased price. Some of the fears about a burdensome surplus of wheat that could not be stored or sold, which were expressed by many persons a year ago, fortunately have not materialized. These fears were first that there would be insufficient storage space to hold the grain from the 1941 crop—that is why the delivery quota allotted to farmers was set at a comparatively low figure—then that only a comparatively small amount of wheat could be sold overseas and only at an extremely low price. Today there is a great deal more storage space available for this coming crop than anyone thought possible, and Canada this present year will export much more wheat than was considered could be done, and now the open market price is increasing. (The price of wheat on U.S.A. markets has increased considerably.)

The government, therefore, in fairness to our farmers should this year pay a considerably higher price for wheat, and in addition can accept much more wheat than it did last year without crowding available storage space.

THE PRESS SPEAKS

Old Virtues Needed

No individual can keep up his peace-time outlay and be able to take his fair share of the obligations inseparable from Canada's participation in the war. This is just as true of governments as it is of individuals. The prudent way of living will be the simple life and it may be that this will also be the healthiest and most wholesome life as well—Amherst News, Nova Scotia.

Money Is Available

Occasionally one hears the suggestion it is going to be difficult to subscribe the \$600,000,000 victory loan to be issued next month but when it is noted that savings banks deposits in Canada amount to \$1,639,000,000 the task need not be of such great difficulty.—Niagara Falls Review.

Keep flowers out of drafts as much as possible; they are more susceptible to a chill than humans.

—Winter hasn't stopped the Russians in their victory drive against the Huns, and winter is not going to stop the victory workers of the East Line," said Mr. Whelan.

CHURCH NOTICES

UNITED CHURCH
Irma—Sunday school 11 a.m.
Public worship 7:30 p.m.
A hearty invitation is extended to all.
Sacrament of the Lord's Supper will be administered at close of service.
Rev. John M. Fawcett will speak at a meeting at 8 p.m. on Feb. 24.

ST. MARY'S CHURCH
Afternoon service at 2:30 p.m. on February 22nd.
Lenten service Thursday evenings, commencing Feb. 19, 8 p.m.

MATCHING RUSSIAN SPIRIT

Prince Albert, Feb. 16—Back from a tour of prairie communities in the neighborhood of Prince Albert, W. W. Whelan, deputy organizer for the Prince Albert division of the Victory Loan 1942 campaign, reported that people everywhere were showing enthusiasm which augured well for the success of the drive despite the handicaps of campaigning in the winter.

"Winter hasn't stopped the Russians in their victory drive against the Huns, and winter is not going to stop the victory workers of the East Line," said Mr. Whelan.

FEED SPECIALS

NORTHWEST HOG PROTEIN 3.25
MINERAL SUPPLEMENT, 100 lbs.

There is no other supplement available to equal this Northwest product. It contains all the ingredients that other supplements do, PLUS VITAMILK, which is made up of high lactic dried buttermilk, dried yeast, fish oil blend, riboflavin concentrate, irradiated yeast, oil of wheat embryo, extract of fish oil, iodine, chick vitamin, sulphur, carotene, iron sulphate, ascorbic acid, copper sulphate, menadione, manganese sulphate, thiamin chloride, nicotinic acid, choline chloride, cal. pantothenic and pyridoxine. Although these names may mean nothing to you, they do mean a lot to your hogs.

Christie's Premium Soda Crackers

Substitute Materials

As the war spreads to all parts of the world people are finding themselves more and more restricted in the variety of articles which they may purchase freely. The continent of Europe has been greatly affected in this regard, for as the Germans have extended their authority over the land, the economic blockade has of necessity been enforced by the Allied nations. Since the outbreak of hostilities, the people of England have experienced strict rationing of food, gasoline and fuels, and clothing. So far, on this continent, that aspect of the war has weighed lightly upon us. For some time now, housewives have assumed a voluntary, and very effective system of rationing bacon and other pork products. Last summer a voluntary system of rationing gasoline was introduced. That is now being put on a more strict basis, and rubber products and sugar have been added to the list of restricted articles. From the outset of the war we have found that metal products are increasingly scarce, and doubtless as time goes on we will find more and more of a scarcity of articles which we are accustomed to purchase. In all that they have been asked to do, both in voluntary and enforced rationing, Canadians have co-operated cheerfully, and there is no doubt that any further restrictions which they are called upon to accept, will be met with in the same spirit. Premier Churchill has predicted that in 1943 there will be a gigantic Allied offensive, and when that time comes there is no doubt that Canadian industries will supply no small part of the necessary weapons. Thus we must expect that more and more raw materials will go into the war effort, while others will be cut off from us because of the curtailment of communication with the source of supply, with the result that we will find articles which we are accustomed to purchasing, disappearing gradually from the market.

Development Of Synthetics

An interesting aspect of the curtailment of the supplies of certain metals and other materials is the development of synthetic substances which can be used as substitutes. In Germany this method of overcoming shortages of basic materials has been used very extensively and we have heard stories of the ardent, if not wholly comfortable Nazi, who drinks synthetic coffee, walks on shoes of synthetic leather and wears suits of synthetic fabric. In this country we have several substitute materials, which are being used increasingly to take the place of fabrics and metals no longer available. Rayon, synthetic silk, has been in common use for some time, and a newer substance, nylon, is now on the market and is widely used in place of silk.

Made from wood pulp, and coal tar products, the basis for these materials is plentiful in Canada, and with them at hand, the cutting off of silk imports from Japan will work no hardship here.

Use Of Plastics

Another type of synthetic materials which are being widely used as substitutes for metal and other hard materials, are called plastics. Chemically developed from resins, which have their origin in certain plants, these materials have been found to be remarkably adaptable for many uses. They combine lightness with great durability and it is thought that they will become more and more common as their production develops. Already we are accustomed to seeing them in many household appliances such as door knobs, light switches and various other articles.

They are used successfully for certain airplane parts, which adds to their value at this time. It is interesting to note that Henry Ford has recently taken out a patent for a new type of automobile, with a body of plastic material. In the patent, Mr. Ford says: "The object of my invention is to provide a body construction in which plastic body parts are employed, not only for the doors and side-panels, but also for the roof, hood, and all exposed panels on the body." Plastic parts, he continues, "have many advantages in that they produce a quiet body, may be molded to exact size, may be readily replaced in case of accident, and result in lighter construction." No doubt when the war is over, and many of these plastics materials are no longer needed in such quantity for airplane production, they will come into even more common use, and replace many of the articles we ordinarily use, bringing an improvement, because of the many desirable features they possess.

French Guiana's major product has been gold, which has been mined there since 1853.

Occupied Europe, observes the Edmonton Journal, is beginning to bite the hand that does not feed it.

Don't Let Your Liver Make You Invalid

People who are off colour say they're liverish or their liver is bad! Do you know how serious this is — that it may lead to permanent ill health — your whole system poisoned and broken down?

Your liver is the largest organ in your body and most important to your health. It supplies energy to muscles, tissues and glands. If unhealthy, your body lacks this energy and becomes enfeebled—youthful vim disappears. Again your liver fails and you feel tired, get rid of waste and allow proper nourishment to reach your blood. When your liver gets out of order proper digestion and nourishment stop—you're poisoned with the waste that decomposes in your intestines. Near troubles and rheumatic pains arise from this poison. You become constipated, stomach and kidneys can't work properly, but also for the liver system is affected and you feel "rotten," head-achy, back-achy, you feel tired and you feel for sickness and disease.

Thousands of people are never sick, and have you prompt relief from these troubles by using "Improved Fruit-Lax Liver Tablets." The liver is toned up, the whole system functions normally and fasting good health results. Today "Improved Fruit-Lax" are Canada's biggest selling liver tablets. They're so good try them yourself NOW. Let "Fruit-Lax" put you back on the road to lasting health—feel like a new person. 25c, 50c.

"Constantly In Pain, Now A New Woman"

For a long time I felt very miserable with liver trouble and constipation. I had brought on such a bad case that I could hardly do my housework. My husband said I was a "fruit-lax" and felt better at once. After using only one box, constipation left me and I felt like a new woman. Miss J. Duplant, Cornwall, Ont.

"Suffered For Years, Now Feel Great"

I was always irritable, tired, head-achy, I could not eat or sleep well and I had very severe constipation. After trying many medicines I found "Fruit-Lax" my best friend. My head-aches and constipation have disappeared and I am now tired of irritable now. Mrs. J. L. Lohr, Montreal, P.Q.

The Individual Citizen's Army

A Weekly Column About This And That In The Canadian Army.
By Alan Maurice Irwin

Last week the only reference made in this column to Army slang had a slight note of acidity. This week as Ed. Wynn used to say "The programme is going to be different." For once the resurrection of Army slang from the dim mists of a peaceful past ties up very directly with a piece of news full of interest for the members of the Individual Citizen's Army and their army of relatives and friends.

The term is "square-pushing" and the news the promised issue of a "walking out dress" to all Canadian "other ranks." Perhaps I should clarify "other ranks." This means all soldier other than commissioned officers. It saves paper, which is a commendable war time economy, and it saves breath, a wise thing to do at any time. Were this term not available, it would be necessary to speak of sergeants, warrant officers, non-commissioned officers and men. So the two-word substitution is an economy.

The relationship between the story of the new uniform and the slang term "square-pushing" is very close. In the piping times of peace—and I admit there are those who never associate bagpipes with peace—the soldier was issued with two uniforms, one in which to train and fight, and the other, frequently variations of scarlet and blue or the dark green of rifle regiments, for walking out after the day's training was over. This "walking out" uniform in barracks was known as the "square-pushing" uniform, and although to-day's young soldier is perhaps not familiar with "square-pushing" rig as a colloquial definition the term does apply to him because by the middle of March he will be the proud possessor of it—to revert to the piping times of peace again—what we used to call a "best suit."

This new uniform consists of a smartly cut jacket and slacks, black low shoes of a lighter weight than the issued "ammunition boots" worn with battle dress, collars and tie and raincoat. In general appearance, although it is cut of the same weight as were our jackets in the last war, it very closely resembles the jacket worn by officers even to the breast pockets with the regulation Army pleat in them and there are patch pockets in the sides. This uniform, with which the "officer" soldier is permitted to carry a "swagger stick" therefore becomes the modern equivalent of a square-pushing uniform.

With the aid of a copy of "Songs and Slang of the British Soldier—1914-1918"—which is the personal property of a member of the staff of the Historical Sections of the Army in Ottawa, I have been able to locate several definitions of "square-pushing." The term is first recorded in the 1880's as being current in garrison artillery units and its origin is thought to be derived from the fact that soldiers were frequently seen escorting nursemaids as they pushed their perambulators around the "squares," then a frequent feature of town planning. Later the term "square-pushing" according to the authority, was applied to a soldier going out in the evening "to court a particular girl or perhaps to find one." In 1914-15 this piece of Army slang was revived again to apply particularly to boots and, since members of the Canadian Expeditionary Force were amongst the best paid allied soldiers, it is quite likely that they were the principal purchasers of civilian boots to wear with their uniforms when off parade and attending social events, i.e., "square-pushing."

All of this becomes very apt once again as the new issue of "walking out dress" includes—something unheard of prior to A.D. 1941—to use the Ordinance term, "shoes black, low, leather, pairs one."

Italians Tired Of War

Depressed by the number of men they have lost in the African and Russian campaigns, the people of Italy are becoming weary of the war, according to reports reaching Lisbon, and many arrests have been made in Naples and Genoa.

SELECTED RECIPES

HOT BREAKFAST BREAD

1 1/2 cups all-purpose flour
2 teaspoons baking powder
1/2 teaspoon salt
1/4 cup shortening
1/2 cup white sugar
1/2 cup Brown Syrup
1 egg
1/2 cup milk
1/2 cup currants
1/2 teaspoon cinnamon
1 tablespoon brown sugar
Temperature: 375 degrees F.
Time: 20 to 25 minutes.
Method: Sift together flour, baking powder and salt. Cream shortening; add sugar, syrup and unbeaten eggs; beat thoroughly. Add flour mixture alternately with milk, stirring lightly. Pour into cake pan 9" x 12" lined with waxed paper and oiled with Mazola. Mix together the currants, cinnamon and brown sugar; sprinkle lightly over raw batter. Bake in moderate oven. Serve hot.

Making Preparations

Hitler Is Building Up Reserve Army For Spring Campaign

The London Daily Mail reported in a despatch from Madrid that Hitler had recalled all active divisions from France, Belgium and Holland to build up a reserve army for the Nazi spring campaign. Their places in the occupied zones have been taken over by garrison divisions of men over 40 and boys from 16 to 18, the newspaper said.

Any Port In Storm

Three sergeants of a bomber forced down in Libya hid in caves and wadis or tents of friendly Arabs until they were rescued by advancing British troops. Besides large families of Arabs the tents also housed a collection of cows, goats, hens, a few cats and a multitude of insects.

Will Make Work Easy

Prime Minister Churchill may have been wrong when he said it would be impossible to restore completely the bombed House of Commons. Charles Marshall, a Chemist, Surrey, historian, has dug up complete original drawings for architects to work from.

The Victoria River Downs Ranch in Australia is said to be the world's biggest. It covers an area of 10,000 square miles, or one-third of the area of New York State.

The average family, we are told, spends \$10 a year on soap. The average small boy in the family considers that a waste of money. 2450

SO YOU'RE GOING TO DO A PLAY?

Casting The Play

The books arrived two days ago and notice was posted at once giving time and place for reading tryouts. I thought we might cast Ronald Mitchell's play "A Husband For Breakfast." It is a roaring comedy and I thought might be well worth the royalty of five dollars we will have to pay for it.

The group have arrived. Five girls and two boys. It is a dialect play, but we are dropping a great deal of it as the Welsh dialect is very hard to carry through a 30-minute play. Just a stray phrase has been left here and there to give the atmosphere. As I look over the group I feel that Carol may have the best voice and give the best interpretation of words but Marion or Helen certainly have the physical requirements. So we begin. I sit with my eyes closed in the corner, and listen as they read, having cast them tentatively. After a page or two, I stopped them, made some notes in my book on their approach to the reading, and changed their parts. This time Nan was asked to read the lead with Francis as the gossiping neighbor who has just dropped in. The boys alternate the reading of the men's parts. And so it goes until we have read the play through. Then I ask if there is any special part that anyone wishes to try out for again. Then while they are chatting, I weigh the physical equipment that each player has, against their ability to read, taking into consideration their ability to do good honest, hard work, and select the cast as follows:

Marion, for the lead, as Mrs. Jones. It is a heavy part, and she looks the way this woman should look. Marion has always had difficulty with lines, but this is her one big chance as this play is a festival number, and I will give her a month if she is going to make good. If Marion doesn't, well, Carol will be delighted to change places with her and do a good job, but won't look the part as Marion would have. Nan is the little old gossiping neighbor with the limp. Nan is pettish and dark and has a sweet, carrying voice. Helen is to be Morris who is robust, coarse and loud. I can get her to use her voice loudly, but usually with some individual tuition. She is tall and well built and some extra clothing will give her a robust appearance. I will have to teach her to turn on laughs like water from a tap, but we have at least three and a half months to that. The other parts are similarly cast. As for the men, the tall thin boy with the mild voice will be patient bespectacled husband who falls asleep during the argument, and Jerry will be Moses Roberts who has a resounding voice and gets into fresh difficulties getting out of last night's difficulties.

I almost lost a good member of my cast, a couple of days ago by saying that I liked casting to type for festival work, and then asked Anne to be a homely, down-trodden wife who was the mother of seven children. Now when I used the phrase, the class look at Anne and everyone laughs because they understand that it is physical requirements that I consider first, then teach voice requirements if necessary.

We will follow the rehearsals of this play "A Husband For Breakfast" for the rest of this series. You may watch festival results in the spring and judge the results. Do I sound too sure of the outcome? I don't mean to, because other directors may be better teachers and better workers than we are. Here's hoping, however. Till next week, then—Mary Ellen Burgess, Box 326, Regina.

Honored Duke Of Connaught

Stockholm advises that the Swedish court went into mourning six days for the Duke of Connaught, last surviving son of Queen Victoria. The Duke was closely connected with the royal house of Sweden, his daughter, the late Princess Margaret, having married Crown Prince Gustav Adolphus in 1905. She died in 1920.

For Armed Services

Laboratory equipment, operating tables, X-ray equipment, surgical instruments, anti-gas ointment, stretchers, dental supplies and false teeth are a few of the medical supplies purchased by the department of munitions and supply for the armed services.

She read the fancy recipes.

Each one a tempting winner. Then dashed away and opened up A can of beans for dinner.

NO MORE PILLS AND POWDERS FOR US..WE'VE DISCOVERED ALL-BRAN!

ANNE TEDLOCK BROOKS

What Has Gone Before: Knox Randolph and his daughter invite Major Towne and Christopher Sande to the old plantation home for lunch. They are to discuss the finding of the papers that make Tamar half owner of the place, and the idea of a new contract that will give the Randolphs a more equal share of whatever gold is taken from the mine. It is here that Tamar's suspicions are aroused by Towne's actions. Later they start for Dick Sheridan's office to draw up a new contract and Tamar, seeing Ranny, tells him the news also.

CHAPTER IX.

"I know something that you should have learned before your father agreed to lease the land. I found it out purely accidentally, too." Ransome Todd leaned toward Tamar, who had settled back again in the chair across from his desk.

Ransome picked up a pencil and traced figures on his blue blotter. Tamar, watching them, saw they consisted of circles and triangles decorated with dots and dashes. "Heaven! Stop it, Ranny! You're ruining your blotter."

He grinned and started to erase them but gave it up as a bad job. "You know the Fettes family, Tamar,

who live on a branch of the Chestnut."

"Why, yes, of course, I saw them this morning." She remembered the dirty children, the barking of the dogs and the scratching, dusty chickens around the shack. A fleeting picture of Madcap's boiling with her and of Christopher Sande's hand arms catching her up also came to her.

"Phineas Fettes came in yesterday afternoon just before the bank closed, on a little business. He was sent in to me for renewing a note and when asked about the possibilities of paying it in two months he said they were excellent. The ground's pizen with gold, Mr. Todd. The Cricket Hill's worth a fortune. I saw some men working around there last February."

"Last February?" Tamar exclaimed. "Why, how could that be?"

"That could be easily done and no one would suspect a thing. I honestly believe that the Major knew all about the chances for his strike before he ever took an option on the mine. I think that he had enough sample ore taken out of there in February to test."

Tamar sprang to her feet. "Is there any way we could ever prove it?" Ransome stood over his desk. "I don't know what to say. The thing to do now is for you to make any demands you see fit in the amount of your percentage of the product. It may be best right now for you not to reveal your suspicions."

Tamar's face was pale. "I don't like to think about dealing with a man like that though. If he is that dishonest he may be dishonest in other ways, too."

"That's why you should write your own terms into that contract. My advice is to go ahead now and take what you can get."

Tamar turned at the door and held out her hand. "I want you to know, Ranny, that I think you've been grand over all of this and that I do appreciate it."

She was gone then, and Ransome saw her run up the stairs through the glass door of the lobby. When she reached the law office of Sheridan & Sheridan Christopher Sande, had thoughtfully disappeared, and only the Major, her father and Dick Sheridan were there.

The men courteously rose and she motioned them back to their seats. "Thanks, Dick," she said sitting down to his desk.

She was always to remember the hour that followed. Her father looked at her questioningly when she raised the amount that he asked for, by 15 per cent. more. She looked at him jealously and her clear eyes perhaps he saw that she had reasons. The Major set his lips and his jaw and settled back in his chair. Dick Sheridan had already procured a duplicate of the document that Tamar had found in the old trunk this morning.

In the end Tamar had her way about the terms of the contract. It had been necessary to hint to the Major that she knew about the workmen seen about the mine in February, she would have mentioned it; but something warned her to be glad that he did not have to tell of it. If her father had known he probably would not have had any dealings with the Major.

The Major was silent as they went back down the stairs and into the mid-afternoon sun. The engineer joined them and they went back to Shadwell. Tamar and her father watched the long black car glide back down the drive, as they stood together on the veranda.

As it turned the curve in the road, he turned to her with a question in his eyes that were so nearly the color of hers.

"Don't ask me why, Dad. I just think it was the right thing to do. I have a feeling the Major isn't as honest as he tries to pretend. It must be Grandfather's blood showing up in me. As Phoebe says: I got my dander up!"

"You've got a good business head, Tamar," he said stooping to kiss her cheek. "Let's go tell Mother about our afternoon."

It surprised Tamar to see how much work had been done at the mine the next time she visited it. This time she did not take Madcap, but drove her own coupe that her father had given her for a birthday present the week before.

The air to-day was cool and she had put on a soft blue sweater, and navy slacks. She took off her sun glasses and slipped them into their case. She stepped up on a rock and stood watching the men at work. Her bare hair caught and held the sun and it flashed blue black against the turn of her head.

Christopher Sande, emerging from the darkness of the tunnel into the Cricket Hill, stopped in surprise as he saw the slender girl poised on the big rock.

"Hello!" she called gaily. "You have company."

He crossed the path over to meet

her. "Don't you know that you really shouldn't come here by your self?" he asked gravely, taking her hand.

Tamar smiled. "Oh, I'm not afraid of coming out here in broad daylight. Heaven! I've roamed the hills of Shadwell on Mapac since I was first able to sit in a saddle."

"I know," he agreed. "But it was different then. Don't get the mistaken idea that coming to the Cricket Hill now is just like the good old days. You're far too pretty to trust out on these lonely roads. Why," he grinned engagingly, "even I have a very good notion to spirit you away."

"Do!" she dared him, her blue eyes laughing into his dark ones.

He glanced quickly at his wrist-watch. "I wish I could. But I have to report to the Major at the Kandy Kitchen at lunch."

"I wish it wouldn't seem too forward of me to suggest my taking you there," she said.

"Not at all," he bantered. "I'm used to being pursued by beautiful young ladies with blue eyes and," he said, studying her hair, "the most ravishing curls. It's difficult to evade them—the girls I mean!"

"Egotist! Get in," she started to ward her charge. "We've wasted a minute!" She stepped on the starter and they rolled into the wagon tracks leading back into the road. "I'll bet that you were the dashing hero back in Boston."

"Is that a request for my autobiography, or will it be used against me?"

"Isn't everything one says used against him?" she countered. "Please tell me what you do for fun?"

"You know, the usual. Dancing, football games, skiing in the Winter. But my secret love is sailing. I have my own sailboat, the Betina."

"That must be lots of fun. I think I'd like them. We ride and dance and swim here for amusement." With a sweeping of her hand she brushed the curls from her eyes. In her well fitted slacks suit, he could see that she had the grace of one who excelled in swimming, dancing and riding.

"Do you think I can find a horse to use?" he asked. "I'd love to go riding with you one of these early mornings. We could go about 6, and I'd get to the

Cricket Hill in plenty of time to start work."

"Oh, we can make some arrangements about that. She wished for Tahlahneka II. back again so that Christopher Sande could gallop over the dewy meadow with her, in the early sunrise that Shadwell knew. Perhaps she could borrow him from present owner, Ransome.

An odd feeling possessed her. Wasn't it just a bit unfair to borrow the roan from Ransome to lend to Christopher?

She was still toying with the idea, and wondering how it happened to strike her, when she drove up in front of the Kandy Kitchen.

The Major's car was standing outside and Sande remarked: "I hope I'm on time. Won't you come in and have lunch with me?"

He stood with one brown leather boot up on the running board, his soft felt hat, in his hand.

Tamar's heart turned over. Her hands gripped the steering wheel to keep from trembling. "Thank you, no. I'll stop a bit and pick you up to take you back in an hour."

"I'll be ready," he said.

She drove slowly down the street that was empty save for the loiterers on the corners and the conversationalists on the park benches skirting the courthouse. Tahlahneka was at lunch. Several of the business men patronized the Kandy Kitchen counter for their meals, as it boasted one of the finest cooks in town.

She felt her hands still trembling. Christopher Sande, his name had a lovely sound. His face rose before her, strong featured, dark eyes that had dreams in their depths, straight, jutting brows. Like something struggling for attention, came another face before her, blonde hair softly waving back from a wide forehead, dark eyes that had more than dreams within them.

Why should Ransome's face assert itself across her vision, when she wanted to think only of Christopher?

Suddenly she gasped. When she slowed for the white light, some one sprang on the running board. It was Ransome. He smiled, which helped take the sting out of his bantering: "In the taxi business?"

(To Be Continued)

From War To War

Horses Which Were Almost Eliminated Are Now Coming Back

Horses are coming back. That's the news from the farm front. With gasoline and rubber and steel on the roads, the list of their need for fighting the war, old Dobbin promises to come back into his own. Horsepower on the farm is likely to mean just that, and in increasing measure as the war goes on.

It was, strange as it may seem, during the last war that farm mechanization got its first big boost in Western Canada. In those days war equipment was much less complicated than now, and mechanization did not require so much steel, gasoline and the like.

During the war, too, wages of farm labor jumped to six and eight dollars a day, and with farmers being called upon to the limit of their capacity there was a demand for machines that would do a big job faster than horses could do it. Thousands of the new gasoline tractors were sold in South Alberta in 1916, 1917 and 1918, and that was the beginning of Dobbin's near-extinction—Lethbridge Herald.

Canadian Hog Production

Prarie Provinces Have Been Increasing Their Output

An upsurge in western Canadian hog production has brought new encouragement in the campaign to provide the United Kingdom with a record-breaking 600,000,000 pounds of bacon under an existing contract, agriculture department officials said. The most spectacular production gain of the year has been reported on the prairies. Saskatchewan's hog carcass gradings for January totalled 70,286 compared with 48,284 in the same period last year.

While western provinces have increased their output, Quebec and Ontario deliveries have lagged thus far in 1942.

"While the percentage of increase in production is in proportion to the increase in contract requirements, the picture is more encouraging in the last few weeks," an agriculture department official said.

Public co-operation in keeping down bacon consumption and further production gains still will be necessary to complete the contract.

The average man has 24,000 hairs, each about 306 inch in diameter, on his head.

The Spaniards established the first permanent colony in New Mexico in 1598 at San Gabriel. 2451

Factories in Miniature

Any Housewife Would Envy Kitchens For British War Workers

Housewives anywhere may envy the great kitchens which are now part of Britain's war factories serving substantial meals at 35 cents, and washing up in one hour 12,000 plates, cups, saucers, knives, forks and spoons without a single dishcloth.

Here is one of their meals: Scotch broth, roast lamb, mint sauce and two vegetables, apple tart, roll and butter, coffee.

The new kitchens which prepare these meals are themselves factories in miniature, with ovens as high as five feet. Into one machine goes the potatoes which are peeled at a speed of 56 lbs. a minute; another machine mashes the potatoes; a third rolls out the pastry for the apple tart.

When they are all cooked, the dinner goes into a vast hot cabinet, 150 at a time; and 7,000 workers sit down to this good hot meal little more than ten minutes after they have knocked off work.

Anything left over is tipped into a bin and a warm spray is played upon each side of a line of empty belt. The plates are then doused with cold water, a hot spray is turned on them and they dry at once as they meet the cold air.

And not a dishcloth is used in the washing up of this dinner for a family of 7,000 workers for the war.

GEMS OF THOUGHT

GOOD WILL

He who wishes to secure the good of others has already secured his own.—Confucius

The great secret of help is encouragement.—Octavia Hill.

We anticipate a time when the love of truth shall have come up to our love of liberty, and men shall be cordially tolerant and earnest believers both at once.—Phillips Brooks.

In every age and clime, "On earth peace, good will toward men" must be the watchword of Christianity.—Mary Baker Eddy.

Be courteous of behavior and affable to all men; there is nothing that winneth so much with so little cost.—Sir Henry Sidney.

Let a smile do the service of a sermon.—Louis Anspacher.

Both Troubles Identical

Air Sickness And Sea Sickness Caused By Same Conditions

People who have suffered from seasickness can sympathize with R.C.A.F. trainees who suffer the misery and indignities of air sickness. Those unfortunate victims who have experienced the discomforts of mal-de-mer and mal-d'air state that both troubles are identical so far as the distress with which the sufferer is afflicted. Both are caused by the same conditions—an unstable and swaying motion underfoot that creates an unstable and swaying motion of the stomach. Results are both disconcerting and embarrassing.

But it really need be no embarrassment to a person who becomes seasick or air-sick. It is not an indication of weakness. Some people must suffer from it while others remain immune. Many a lake skipper and seasoned sailor on his first trip each spring becomes sea-sick until he regains his sea-legs, lost by spending the winter on shore.

Wine-making is the chief industry of Portugal. 2451

HOME SERVICE

DREAM MAY GUIDE YOU TO SOLVING A PROBLEM

Even Silly Ones Are Revealing

An idyllic dream! It seems that in his kitchen, frying bacon and eggs, was a man from the office whom he disliked. Though he protested his visitor just laughed contentedly and presented the platter to the dreamer's wife who said, "Bacon is sweet and so are you."

It sounds silly enough, but any psychologist will tell you that your silliest dream may contain the clue to inner conflicts, conflicts you may not realize.

Perhaps you, like this man, suffer from a fear of competition. In his dream, his subconscious wove a revealing drama based on the common phrase, "Bring home the bacon." His feared other men were better able than he to hold his wife's affection and to provide for her.

Your subconscious may also use common objects or images as symbols of your secret emotions. A dream of a screen hints you're making excuses for yourself; a dark place symbolizes marriage. Or do you dream of prison, snakes, music, a burning house?

Our 32-page booklet scientifically explains many common dreams and dream symbols, helps you understand their relation to your problems. Discusses sex dreams, dreams that come true.

Send 15c in coins for your copy of "The Meaning of Dreams" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

152—"Gossiping Speaking Self-Taught."

118—"Good Table Manners"

110—"Hand-Made Gift Novelties"

100—"Vitamins To Keep You Fit"

101—"Life Begins at Forty"

160—"Planning and Budgeting Your Wedding"

Both Sides Different

Paraguay's flag is not the same on both sides. It has a lion on one side and a star on the other. It is the only country in the western hemisphere to have a two-sided flag. The only other country in the world to have such a flag was Lithuania.

World's Week

By HAROLD L. WEIR
Associate Editor and Daily
Columnist of the Edmon-
ton Bulletin

Japan cashed in heavily this week on its superior air, sea and land strength in the western Pacific.

Aware that if they do not gain possession of all the vital spots of the far east within the next few months they will never get them and will be doomed to disastrous defeat, the Mikado's forces struck with fury and audacity on a greatly extended front.

They pressed on in Burma in an attempt to cut China off from American and British aid. They exploited their mastery of the air, land and sea environs of Singapore in a successful attempt to seize that great bastion. They sought to deprive the Dutch of air-Harold L. Weir

dromes and sea bases whence such vigorous resistance has been offered to Japan ever since Dec. 7.

From key positions recently seized in the south-western Pacific the Japanese are seeking to close the shorter routes of sea and air communications between the United States and the Indies as well as between Australia and the Indies and Singapore.

That is the explanation of Japanese bombings of airplanes and vessels in the Timor sea, the Torres strait and other waters north of Australia.

Such operations also are designed to create panic in Australia which in addition to sending superb fighting men to the far and middle eastern fronts contribute materially to the anti-Axis cause by manufacturing badly needed fighting equipment such as planes, heavy guns and tanks.

Obviously if American and British naval and air strength in the western Pacific can be materially increased in the near future, Japan's audacity may contribute to its earlier defeat. Japan in short, has gambled heavily on the united nations' inability to grow strong in the western Pacific in the near future.

These considerations lend special importance to Gen. Sir Archibald Wavell's remarks on Feb. 4. The supreme allied commander in the far east said 'great reinforcements' of American and British troops are being sent to wrest the initiative from the Japanese.

In the meantime it is apparent that the allied naval position in the Pacific has already recuperated to a considerable extent from the severe losses incurred early in December at Pearl Harbor and Singapore. Otherwise the American fleet hardly would have dared attack Japanese naval and air bases on the Marshall and Gilbert islands, lying between Hawaii and Australia.

No light was thrown this week on the relations between Japan and Russia but the news from Russia and Germany suggested that the Soviet Union is likely to have its hands full in Europe for many months to come and that Russia may not be in a position to throw any considerable part of its great military weight against Japan in the near future.

The dispatches from Moscow indicated increased German resistance and the receipt by German forces in Russia of air-borne reinforcements. Italian planes were revealed to be fighting on the Russian front.

How much of the military strength Hitler is now assembling in the Balkans and in other parts of occupied Europe will be thrown against Russia and how much will be used for a drive against Iran, Iraq and the Suez canal, of course is unknown.

But it seems probable that Hitler's spring offensive will not

look Russia.

Russia is understood to have fresh troops and considerable equipment in reserve for whatever Hitler may attempt in its direction but the Russians are disappointed by their failure to receive all of the material promised them by the United States and Great Britain.

As previously reported, American supplies are reaching Russia in "increasing quantities" but a New York Times dispatch from Washington a few days ago said that "less than half" of the equipment promised by the United States had been delivered to Russia.

in the last three months and this failure to make deliveries was particularly serious in the light of the anticipated spring offensive.

Russian commentators have warned Turkey that Hitler's moves are designed to seize control of the Dardanelles from Turkey preparatory to a new grab at the oil of the middle east.

Hitler wants to split the front of the United States by seizing the Suez canal as well as the Iraq and Iranian oil fields. The advent of the WAFD (Nationalist government) in Egypt this week should impede realization of that Axis objective.

The King of Egypt has not been friendly to the British and his governments have been equally unco-operative. Mutapha Nasha Pasha, the new premier, is by no means a British puppet but he has co-operated far better than recent Egyptian premiers and his party—the dominant political group in Egypt—is far friendlier to the British than the Axis cause.

—V—
This paper invites its readers to listen to The Saturday Night Review which is broadcast by Harold L. Weir every Saturday night at 8:15 of CFRN (1280 kc.).

LET'S KEEP OUR CANADA *a happy land for them*

PINKY-WHITE DIMPLES; a button of a nose; wee, slender fingers clutching at your coverlet—what kind of a world is this to which you will awake?

Your life, we hope, will be rich in love and laughter. God forbid that your Canada should ever come under the heel of a ruthless barbarism, where babies are born to be the future shock troops, or the mothers of a brutal, military race.

We promise that you: shall inherit a Canada blessed with the liberty our fathers bequeathed to us. You shall be free as we are free.

So we gladly lend our money to our country in this crisis. We will buy Victory Bonds to the very limit. We must and we will make sure that the threat of a brutal way of life is banished forever.

HOW TO BUY—Give your order to the Victory Loan salesman who calls on you. Or place it in the hands of any branch of any bank, or give it to any trust company. Or send it to your local Victory Loan Headquarters. Or you can authorize your employer to start a regular payroll savings plan for you. Bonds may be bought in denominations of \$50, \$100, \$500, \$1,000 and larger. Salesman, bank, trust company or your local Victory Loan Headquarters will be glad to give you every assistance in making out your order form.

VICTORY BONDS

National War Finance Committee, Ottawa, Canada

HOUSEHOLD HINTS

In cleaning gas ovens, put a little ammonia in the water. The cleaning will be made easier and the ammonia prevents the ovens from turning brown.

Never throw away bones left from a roast or shoulder. Put them on in cold water and if cooked several hours, a very good soup may be obtained with the addition of diced vegetables.

Try combining a cup of whipping cream, whipped just enough to hold its shape, with six tablespoons of apple butter, added two tablespoons at a time, blended well after each merger. Heap a fluffy mound of this yellow mixture on your favorite cake cakes.

For best results—After putting water and soap into washing machine, let it run for a minute or two to dissolve soap before putting in clothes.

Cottage cheese, mixed with orange marmalade, grape jelly or raspberry jam, makes a good filling for graham bread sandwiches. These combinations are tasty as well as nutritious.

BANK OF MONTREAL

INVASION OF OTTAWA

In 1917, three years after the Great War started, farmers on the Canadian prairies raised 233,742,850 bushels of wheat and received therefor at local shipping points \$453,038,600 or an average net price of \$1.94 a bushel.

In 1941, when the present war had been in progress for two years farmers on the prairies produced 279 million bushels of wheat and received therefor \$139,500,000, or 50c a bushel.

Thus, while wheat production in 1917 was 45,257,150 bushels less than in 1941, farmers in the earlier year received \$313,538,000 more than the wheat farmers in 1941 received for their greater production. These figures show clearly that the basic cause for unrest throughout the wheat growing areas of western Canada. In the face of the abnormally low price now prevailing for wheat, the costs of goods and services have mounted to extremely high levels.

Caught between the millstones of low prices for his own products and high prices for everything that must be bought, the prairie farmer is justified in feeling that he has been shabbily treated. The success of the plan to increase the vast sign-up (185,000) of petition to the federal government, outlining the new "bill of rights" for the western farmer, and the collection of enough money to send more than 400 farmers in two trains to Ottawa to present the petition to Prime Minister Mackenzie King and his cabinet.

The 49th parallel runs across the prairie sections of western North America and is the dividing line between Canada and the United States. Within there is a community of interest between the farmers north and south of that imaginary line. Canadian farmers know what is going on in agricultural circles south of the border. They know that the United States government developed an agricultural Adjustment Administration, the operation of which have guaranteed a bottom price of around 90c a bushel for wheat. Every United States farmer who co-operates with the AAA can obtain additional cash benefits to the extent of around 30c a bushel, bringing the base price to around \$1.16.

Compared with what he is receiving the Canadian prairie farmer thinks that the United States wheat farmer is well off. Furthermore, he sees the United States congress guaranteeing parity prices for farm commodities produced in that republic. Undoubtedly it was the inspiration of the AAA which brought about the following demands, inserted in the prairie "petition of rights" to the Canadian cabinet.

1. That the government recognize and accept the principal of parity prices for all agricultural products.
2. That no price ceiling should be established on agricultural commodities below parity levels which may be established by the dominion bureau of statistics.
3. That equitable delivery quotas on wheat should be established and continued as long as required.
4. That the initial payment on all wheat delivered to the Wheat Board should not be less than \$1.00

per bushel, basis One Northern in store Fort William, and that the final settlement should be made on the basis of parity prices above referred to.

5. That the carryover of wheat as at July 31st, 1941, should be regarded as a national emergency war reserve, and that all sales made by the Wheat Board after 31st July, 1941, should be credited to the current season's deliveries.

6. That suitable amendments should be introduced to the Prairie Farm Assistance Act, so that an adequate and practical crop insurance scheme may be established irrespective of market prices prevailing or the number of townships suffering crop failure.

7. That since the future of our agricultural industry depends largely on our ability:

(a) to conserve the fertility of our soil;

(b) to establish production and marketing methods which, while maintaining continuity of supplies, will also prevent avoidable surpluses.

And since these objectives may involve an increasing degree of control and regulation, including international agreement, such changes should be made in our agricultural policy as may be necessary to achieve these objectives.

Despite the increase in dairying and livestock production in Manitoba, Saskatchewan and Alberta, the main dependence of this prairie region is on wheat. In 1941 the total agricultural cash income of the prairies, according to the Stanford Evans Statistical Service, was \$347,605,458, and of this total wheat supplied \$168,500,000 and the production of all grains \$199,900,000. The figures are as follows:

| | | |
|--------------|-------|---------------|
| Wheat | | \$168,512,635 |
| Other grains | | 28,447,654 |
| Livestock | | 95,566,962 |
| Butterfat | | 25,363,207 |
| Other income | | 29,915,000 |
| Total | | \$347,605,548 |

The huge delegation received a sympathetic hearing from Prime Minister Mackenzie King. With him were Hon. J. A. MacKinnon, minister of trade and commerce; Hon. J. G. Gardiner, minister of agriculture; Hon. T. A. Crerar, minister of natural resources; Hon. N. A. McLarty, state secretary; Hon. W. P. Mulock, post master general; Hon. Ian Mackenzie, minister of pensions; and Hon. J. L. Ilsley, minister of finance.

A submission by the Canadian Federation of Agriculture was presented by H. H. Hannam, president. He said agriculture sought recognition as a war industry with definite production goals set as far in advance as possible, and with an adequate quota of skilled labor and sufficient farm incomes

assured to hold and pay skilled help and maintain farm equipment.

Hon. J. G. Gardiner spoke after the formal submission of the Federation brief, and gave assurance of sympathetic consideration of the submission. He said agriculture was still recognized as the country's basic industry and he hoped agricultural policies would be discussed early in the present parliamentary session.

The big delegation of western farmers were received by the cabinet shortly after a meeting of the Federation. John H. Wesson, Saskatchewan Wheat Pool president, took the chair.

Mr. King said the government sought to keep all the country united. No part of the war effort could be more important than the basic industry of agriculture. A splendid spirit of co-operation had been shown by agricultural communities.

"We expect you, Mr. Prime Minister, to grant not the smallest but the largest number of our requests consistent with the rights of others," said Hon. W. R. Motherwell, a former minister of agriculture, and a pioneer of the west.

John Sutherland of Hanna, representing the United Farmers of Alberta, and James Jackson of Irma, representing the Alberta section of the United Farmers of Canada, were, among others, given the privilege of speaking.

It is believed that the results of this campaign, inaugurated in the western plains, will bear fruits. Already it has been intimated that the price of wheat will be "upped" for 1942. Other price concessions may come later on. The government must now realize that the western farmers will no longer meekly submit to pressing economic wrongs.—Wheat Pool Budget

VIKING ITEMS

High honors came to the J. L. Slavik rink, the Viking curling club, and the community in general on Tuesday when the Alberta provincial curling championship was won by J. L. Slavik and his high powered curlers, Vince Slavik, Cecil Runyon and Ken Hilliker.

H. A. Meredith returned from a month's stay in the hospital on Tuesday quite improved in health.

The S. Lefsrud law office will be closed from February 23 until March 23.

Stephen Bird, of the R.C.A.F., was up from Calgary over the week-end paying a visit to the home of his parents, Mr. and Mrs. Geo. Bird.

The annual spring horse sale will be held in Viking on Saturday, March 14. Watch for further particulars.

What is Wheat Price Parity?

Parity price for wheat is being widely discussed. Just what is this purchasing price parity for wheat? The Searle Grain Company has just published a pamphlet which describes it. A free copy may be obtained from any Searle Agent.

GROWN IN SUNNY, SOUTHERN ONTARIO

Importance Of Sea Power

The present war was envisaged by the leaders of Germany as a conflict in which air-power would destroy mobility to land battles, destroy cities and workshops on the home front, and break the stranglehold of naval blockade. In this way the Nazis hoped to shorten the period required to secure victory, and to discount, during that period, the wasting effects and deprivation of raw materials and foodstuffs.

The German plan aimed above all at rapid conquest. It was recognized that Germany, like other continental conquerors, might be unable to fight a long war successfully. There was, therefore, to be a lightning victory on land, using air-power and mechanized force to the full, followed by the seizure of French sea-power and the imposition of peace on a cowering Britain, or a lightning invasion if that peace were rejected. The plan took a careful account of the known weaknesses to which Germany was exposed in the Great War. It endeavored to eliminate, in turn, the risk of fighting on two fronts, and the risk of a long war. Air-power was to be the new factor, which would outdate the old conception of stalemate on land and blockade on the sea. Air-power would be the artillery providing the barrage behind which mechanized troops would smash their way through entrenched positions. Air-power would pulverize the enemy's production and demoralize his workers. Air-power would reduce the strength and curtail the movement of warships, giving supremacy at sea to the small but efficient German navy.

A Plan That Failed

The plan which the Nazis considered would revolutionize warfare and bring speedy victory, failed to take into account, however, the changes which air-power has made to sea-power itself. It is the oldest kind of mistake in the long history of warfare—the mistake of applying a ruthlessly new solution to an old problem and overlooking the fact that the problem in the meantime has become no longer quite the same.

To understand fully the effect of air-power in modern total war, it is necessary to understand the true use and meaning of sea-power, for it was sea-power, in the end, which broke the might of German arms in the last war, and sea-power to-day embraces air-power. Sea and air-power has the capacity to win this war, for when Britain puts into the air an overwhelming advance guard of bombing aircraft and fighters, her ships can cross the seas to land whole armies at numerous points along a vast and therefore poorly protected enemy coastline. Wherever superiority in the air can be secured, superiority at sea already exists to make it good. Germany's difficulty in invading Britain is that she must attack with questionable air superiority and great inferiority at sea, an island bastion, the defence of which is organized on the inside of a circle. Britain's advantage is that, given air superiority, she can attack a sprawling and indefensible coast at scores of points, and can secure communications to every bridge-head she builds thereon.

Sea And Air Power Combined

However long the war lasts, Germany is unable to make good her original error—the error of believing that it is cheaper and better to build bombers than to build battleships. To her traditional failure to understand the true importance of sea-power was added a failure to grasp the revolutionary effect of sea-power combined with air-power.

British and Allied sea-and-air-power will turn back the invader and will maintain the Allies' communications and supplies, whilst drawing ever closer the net of blockade around the enemy. It will support and make possible the coming land battles which will bring the final victory. It is the supreme weapon which can win that victory outright.

The Speed Of Lightning

"Fast as lightning" is not a definite rate of speed: scientists say it varies greatly. The speed of lightning has been measured at from 14,900 to 68,400 miles a second. The average speed is about 28,500 miles a second. After the first stroke or "leader," there may be several discharges following each other so rapidly that they appear to the eye as a single flash.

Many Years Ago

At one time, the British Isles were connected to the continent of Europe. The North sea did not exist, but there was a great river that flowed north and met the sea between the shores of Scotland and Norway.

All kinds of social knowledge and graces are useful, but one of the best is to be able to yawn with your mouth closed.

Is Your Liver Poisoning You?

Are you sick and tired out every morning—always constipated—can't eat without pain and distress? Your liver is poisoning your system—**Parasani** will cure it. All health may be the result!

● Your liver is the largest organ in your body and most important to your health. It supplies energy to muscles, tissues and glands. If unhealthy, your body lacks this energy and becomes enfeebled—routinely you disappear. Again your liver pours out bile to digest food, set rid of waste and allow proper nourishment to reach your blood. When your liver gets out of order proper digestion and nourishment stop—you're poisoned with the waste that decomposes in your intestines. Nervous troubles and rheumatic pains arise from this poison. You become constipated, stomach and kidneys can't work properly. The whole system is affected and you feel "rotten," head-achy, back-achy, dizzy, tired out—a ready prey for sickness and disease.

Thousands of people are never sick, and have won prompt relief from their miseries with "Improved Fruit-Save Liver Tablets." The liver is taxed up, the other organs function normally, and lasting good health results. Today "Improved Fruit-Save" are Canada's largest selling liver tablets. They are good! Try them yourself **WILL**. Let "Fruit-Save" put you back on the road to lasting health—feel like a new person. 25c, 50c.

The Individual Citizen's Army

A Weekly Column About This And That In The Canadian Army.
 By Alna Maurice Irwin

A few columns back this space was devoted to that branch of the Individual Citizen's Army administered by the Master General of the Ordnance. It was remarked that there would be more coming on this subject.

Now, following the arrival in Great Britain of an advance party of the First Canadian Base Ordnance Workshop, seems to be a good time to re-open the subject.

"Biggest" seems to be the controlling adjective for pieces about the M.G.O.'s branch. First it was the biggest mail-order house—now comes this new Base Ordnance Workshop which is without question the biggest repair and service station in the world.

But it isn't so much the new workshop I want to talk about as the unconventional character that characterized its formation.

Unconventionality is as much a trade mark of the M.G.O. branch as are superlative adjectives. Which is just as well since this is an unconventional war.

Prime piece of unconventionality, of course, is the heading of the most rapidly expanding branch of the Canadian Army by a civilian. As you know there was a precedent for that in English history.

Now, and this brings us back to the Base Ordnance Workshop, here is another example of the type of unconventionality that is going to help us win the war. Overnight an ex-private, who had made his name a big one in the operation of peacetime mechanized vehicles, was promoted to Lieutenant-Colonel and appointed to command an army organization for which no pattern existed. The ex-private, who had been too busy in the years between wars to carry on in the militia, was G. A. Second of Toronto. One day he was Mr. Second, operator of the H.V. Drive Yourself System, the next he was Lt.-Col. G. A. Second, officer commanding the First Canadian Base Ordnance Workshop.

Here is an amusing paradox. The man responsible for this latest unconventionality is Victor Sifton, Winnipeg newspaperman and Master-General of the Ordnance who reversed the process when he was appointed to his present position.

How come? If you'll stand for a bad pun the answer is "comme ça."

When Lieut.-Colonel Victor Sifton first volunteered his services for the duration of the war he was appointed Executive Assistant to the Minister of National Defence and his name is still painted on the opaque glass of an office door on the same floor as Col. Ralston's office.

The legend reads: "Executive Assistant, Lieut.-Col. Sifton." For economy reasons it was obliterated by a sheet of paper pasted over it when Sifton took over the M.G.O. job.

But when he took over the new job Lt.-Col. Sifton became Mr. Sifton—denoting himself just exactly the same number of steps that he promoted Lt.-Col. Second!

And on the door of his present office there appears just this: "406, Private!"

Unconventional? The word seems pale.

Just recently President Roosevelt appointed William Knudsen Lieutenant-General to do the same job in the United States.

"Lieutenant" is pronounced "Lo-tenant" in the United States and is accorded somewhat the same pronunciation by the British Navy. Soldiers and civilians in the British Empire pronounce it, as you know, "Leftenant." This last army slang, it is true, but it is in line with minor researches into colloquial terminology conducted from time to time by this column.

We have scouts at work and hope to publish the results of their reconnaissance next week.

To Locate Lost Radios

An electric "hound" to track down costly bits of radio and to protect hospital and laboratory workers against dangerous stray X-rays has recently been developed. Resembling a portable radio receiver, it can detect invisible radiation from as little as one ten-millionths of an ounce of radium.

Largest of its kind is the basking shark which attains an average length of 36 feet approximately.

Canada's national parks have nearly 700 miles of motor highways and 3,000 miles of trails. 2451

SO YOU'RE GOING TO DO A PLAY?

One Scene At A Time

How long will it take to do a one-act play? That depends on how much time you have at your disposal. If you are staging a show for raising funds, well, you know how long your have. We are commencing our festival work at Easter time. I can hear you gasp and say, "But my cast get stale long before they finish if they were to work that long." I retort, "Not if the play is well chosen with lots of most in the lines, clever situations, and plenty of conflict, with smart repartee." For a one-act play you should have from 12 to 16 rehearsals to present the show with confidence and assurance that all your players will give a top-notch performance.

To get the most out of a rehearsal, divide your play into scenes, (from one character's entrance to their exit) in often, advantageous. Plan then to practise in small groups. For example in our play, Mrs. Jones and Miss Pugh open the play and chat for several pages. My first rehearsal will take care of that scene and they will be the only ones at rehearsal for several pages. Others will be asked to spend some time that evening looking over lines at home. You will not find it tedious, "looking over," not learning, lines. I do not approve in memorizing lines until we have had several rehearsals and the cast know what type of people they are representing.

Mrs. Jones will be asked to write out all the characteristics about herself she can find in the play. Where she was born, what education she has had, what her parents did for a living, how many others there were in her family, has she a family? What her husband does for a living? How much she earns, and a dozen other things. I hear you say, "Surely you can't find all those things in the script?" Not all of them but a great many are disclosed if you look closely enough. Use your imagination to find out the others from the facts you already know. I tell the class. Yes, they groaned the first time I asked for a biography, but now they are quite accustomed to it, and vie with each other to see who can fill in the most pages. It is very gratifying for they then go to the characterization as if they were working with an old friend. The first time I asked that, Marion?" I will often ask when she does something I think may be done. We stop the rehearsal and discuss the answer and thus become better acquainted with our characters. We often select someone in the neighborhood who somewhat resembles one of the characters in the play, we visit them, watch how they walk, sit and talk, and then go home and copy them to our own satisfaction. It helps and they don't know.

Other rehearsals this week will be succeeding scenes as other characters arrive and join in the conversation. I try and save everyone's time, but demand that in turn they don't waste mine. Everyone must be prompt at rehearsals.

Good-bye until next week—Mary Ellen Burgess, Box 236, Regina.

SELECTED RECIPES

RECIPE OF THE WEEK

All-Brain Apple Butter Bread would win a prize in any bread-baking contest! The apple butter keeps the loaf moist, while the bran gives it a toasted, nut-like taste. Fortunately, it's a quick bread that can be turned out easily and inexpensively by the following recipe:

All-Brain Apple Butter Bread
 1 cup All-bran
 1 1/2 cups apple butter
 1 teaspoon lemon juice
 1/2 cup shortening
 1/2 cup sugar
 1 egg
 1 1/2 cups flour
 2 teaspoons baking powder
 1/2 teaspoon salt
 1/2 cup seedless raisins

Combine All-bran with apple butter and lemon juice; let soak about five minutes. Cream shortening and sugar thoroughly; add egg and beat well. Add All-bran and apple butter. Sift flour with baking powder, soda and salt; add raisins. Combine with first mixture, stirring only until flour disappears. Pour into greased loaf pan and bake in moderate oven (325 degrees F.) for 1 hour and 10 minutes. Cool before cutting.

Yield: One loaf (5 1/2 x 9 1/2-inch pan).

The word "salary" goes back to the time when Roman soldiers were given salaries, or money to buy salt. And people not worth their salt seldom draw salaries long.

This is the end of an ice age, with the polar ice still retreating. There have been five major ice ages.

20 WAYS TO SAVE SUGAR BY USING BEE HIVE SYRUP

Made from Corn

History Repeats Itself!—In 1918, the "Canada Food Board, Ottawa," published a booklet—entitled "Glucose and White Corn Syrup are perhaps the most satisfactory and least expensive sugar substitutes available." "The board recommends the use of glucose wherever possible." "Bee Hive Syrup is 95% glucose." "Bee Hive Syrup is not an 'intense sweet'—it is just as sweet as sugar, therefore the natural food flavours are permitted to dominate more pleasingly."

- Sweeten your cereal, fresh fruit and porridge with Bee Hive!
- Use Bee Hive Syrup when making apple sauce, stewed rhubarb, stewed apricots, etc.
- Use Bee Hive Syrup as a sauce on rice, bread, cottage and other favorite puddings!
- Sweeten your coffee, and cocoa with Bee Hive!
- Use Bee Hive Syrup in preserving!
- Use Bee Hive Syrup for cake icing!
- Use Bee Hive Syrup on ice cream!
- Use Bee Hive Syrup in fruit juice!
- Use Bee Hive Syrup in making candied!
- Use Bee Hive Syrup as a milk modifier in baby feeding!
- Try Bee Hive Syrup in recipes for cake—buckwheat, coconut, coconut pudding, chocolate cake, fruit cake, jelly rolls, jam, marmalade, custard, potato drop cookies, oatmeal cookies, etc.

Doing Their Part

Wild Rose Hips Provide Fruit Juice For Britain's Babies

Even Britain's wild roses have been called on to do their part for the nation.

Countrywomen, boy scouts, girl guides and school children last searched Britain's hedgerows and commons for the annual crop of "hips"—bright red fruit of the wild rose. Processed by manufacturers, some of this fruit has become syrup 20 times richer in vitamin "C" than orange juice which now is scarce.

This quantity will meet the requirements of 2,500,000 babies for a year, allowing 15 drops of syrup a day for each child, it is estimated. One ounce of the syrup is sufficient for a child for one month.

It is necessary to remove and examine four tons of ore to recover one carat of diamond. Only one carat in four obtained proves suitable for fine jewelry.

One-Fourth For Coinage

About one-fourth of the gold produced is used as coinage in normal times, with the remainder being consumed in dentistry, jewelry gilding and gold-leaf work.
